

THE HELP GROUP'S

STEM³ academy

outside the box: students, learning, results

Code your own path

Valley Glen | Irvine | Culver City

A school for bright, curious, technology-driven students in grades K-12 with social and learning differences

Outside the box STUDENTS

Our students are thrice exceptional. They have an interest in STEM, are academically strong, and have social and learning challenges. At STEM³ Academy, we unleash their promise and potential.

Outside the box LEARNING

Our unique and accelerated curriculum is designed specifically for special learners and is project-based & experiential. We offer personalized learning, innovation labs, robotics, science challenges, and many other opportunities.

Outside the box RESULTS

Our graduates thrive in college, have access to an even wider array of careers, and have the potential to be at the forefront of their professions with boldness and assurance.

With an increase in the number of students with neuro-developmental differences who are interested in STEM fields, we know there is a place for STEM³ Academy graduates in tomorrow's workforce. As the first school in the nation to offer a STEM curriculum to students with social and learning differences, STEM³ Academy is designed to help students who have a passion for STEM-related fields while also filling the growing gap for skilled STEM workers nationwide.

Applications are accepted year-round for students in grades K-12.

Residential Options Available: Students may reside in The Help Group's Project Six residential program, located within five miles of the school.
